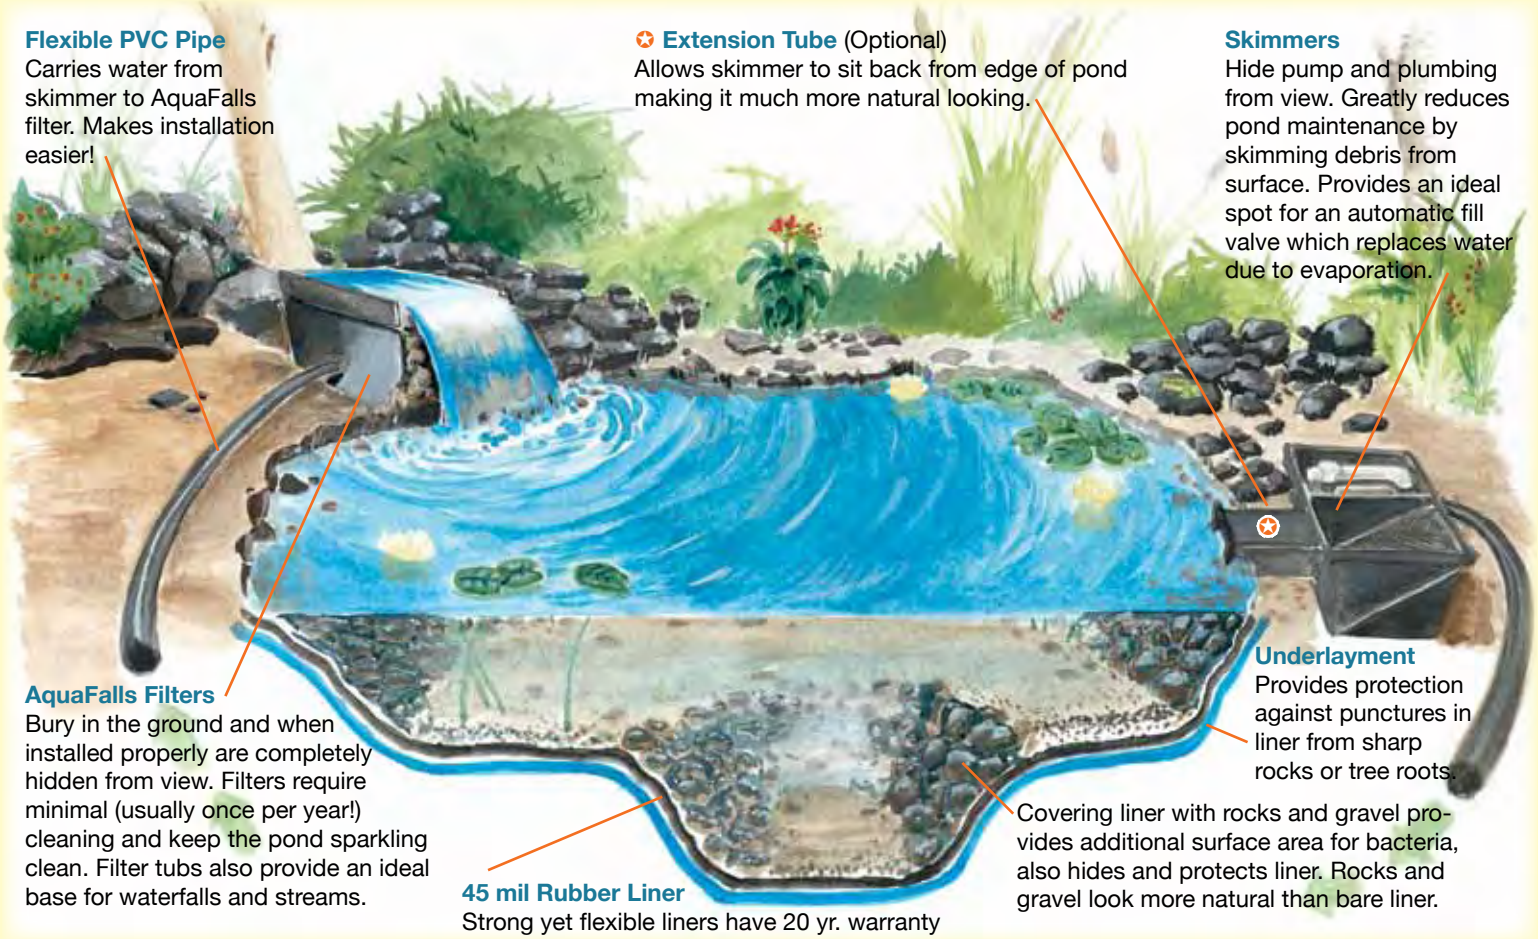
Easy To Use, Professional Pond Products

• SKIMMERS • FILTERS • POND KITS

CROSS SECTION OF A POND KIT



Flexible PVC Pipe
Carries water from skimmer to AquaFalls filter. Makes installation easier!

Extension Tube (Optional)
Allows skimmer to sit back from edge of pond making it much more natural looking.

Skimmers
Hide pump and plumbing from view. Greatly reduces pond maintenance by skimming debris from surface. Provides an ideal spot for an automatic fill valve which replaces water due to evaporation.

AquaFalls Filters
Bury in the ground and when installed properly are completely hidden from view. Filters require minimal (usually once per year!) cleaning and keep the pond sparkling clean. Filter tubs also provide an ideal base for waterfalls and streams.

Underlayment
Provides protection against punctures in liner from sharp rocks or tree roots.

45 mil Rubber Liner
Strong yet flexible liners have 20 yr. warranty

Covering liner with rocks and gravel provides additional surface area for bacteria, also hides and protects liner. Rocks and gravel look more natural than bare liner.

EasyPro Pond Kits include everything you need to build professional looking water features including the industry's best skimmers and filters. Pond builders across the nation have discovered buying their ponds in a kit form is much easier than trying to piece together each job. When you buy a complete kit you know everything you need will be on-site and that all items will work together to give you a great looking pond.

Building beautiful water features is enjoyable when you use the right products. **EasyPro Pond Kits** make you look like you're a pro even if it's your first pond! EasyPro skimmers and filters were designed by pond builders who had installed the other skimmers available on the market, but wanted something better. The results are these skimmers and filters which we feel are the finest available anywhere.

Every Pond Kit Includes:

1. 45 mil Rubber Liner
2. Liner Underlayment
3. Skimmer
4. AquaFalls Filter
5. High Efficiency Pump
6. Check Valve Assembly
7. Waterfall Installation Kit
8. Flexible PVC Pipe
9. Underwater Light Kit With Transformer
10. Bacteria

EasyPro pond products — Pond Skimmers

EasyPro Skimmers are unlike any other skimmer on the market today! Compare the features and the price of these skimmers to any other and you'll see a major difference!

- Revolutionary design allows you to choose between a vertical filter mat or filter brushes!
- Skimmers have a removable center divider, this creates two chambers in the skimmer box — one for filtering and one for the pump! Pumps can be inspected or removed without removing mesh net or filter pad!
- EasyPro Pond Skimmers have a flange above the opening where water enters from the pond into the skimmer. This allows you to not only stack rocks along side the opening but also above the skimmer opening. This makes our skimmers the most natural looking and easiest to hide!
- Skimmers add a professional touch to any pond installation by providing an ideal place to hide the pump from view. Internal filters inside the skimmer prevent the pump from plugging and are easy to clean!
- EasyPro Skimmers have a one piece debris net that's three times heavier than our competition's! One piece design keeps mesh in place and is easier to clean.
- Two chamber design means no more cutting filter pads to fit around the pump!

EasyPro skimmers are available with two different filter types. The first is a filter brush rack. Filter brushes are very effective at removing debris from the water but will still allow water through even when loaded with debris. The second style is a filter pad which sits vertically in the skimmer and can be easily lifted out for cleaning.

Choose your skimmer with either a filter pad or filter brushes.

Mini Skimmer - 20" long x 15" wide x 19" tall

- Handles pumps up to 50 GPM
- 6" wide water inlet
- Skims ponds up to 250 square feet
- Available in vertical style pad or filter brushes
- Works with small extension tube

Part #	Description
PSMFB	Mini Skimmer w/filter brushes
PSM	Mini Skimmer w/filter pad

Ships via UPS Oversize

Small Skimmer - 28" long x 18" wide x 20" tall

- Skims ponds up to 600 square feet - 8" wide water inlet
- Handles pumps up to 100 GPM

Part #	Description
PS1FB	Small skimmer, w/filter brushes
PS1V	Small skimmer, w/vertical filter pad

Ships via UPS Oversize

Large Skimmer - 42" long x 20" wide x 30" tall

- Skims ponds over 600 square feet - 16" wide water inlet
- Handles pumps up to 250 GPM

Part #	Description
PS2FB	Large skimmer, w/filter brushes
PS2V	Large skimmer, w/vertical filter pad
PS2*	Large skimmer w/o filter pad

Ships via Motor Freight

** For high flow applications use skimmer without filter pad to prevent plugging.*

EasyPro pond products — Extension Tubes

Makes skimmers easy to hide! This 24" long extension tube allows the skimmer to be placed back from the edge of the pond. This will allow for planting between the pond and skimmer making it easier to hide! Extension tubes can be bolted together to create longer extensions if needed. Price includes extension tube and bolts for installation.

Part #	Description
SETS	Extension tube, mini or small skimmer
SETL	Extension tube, large skimmer

UV Option

EasyPro offers an optional UV setup for our PS1FB skimmers. The 36 watt bulb is enclosed inside a divider that slips in the place of the PVC divider that is located behind the filter rack. The UV option must be used with filter brush racks not filter pad. The UV option will drop the maximum GPM flow from 100 to approximately 60 GPM to provide maximum exposure time.

Part #	Description
PS1UV	UV Upgrade for PS1FB

AquaFalls Biological Filters

AquaFalls biological filters not only help keep your pond sparkling clean, they also serve as a great start to your stream or waterfall. Designed for use with the pond skimmers for a truly professional looking pond. AquaFalls should be located as far away from skimmer as possible to create maximum circulation.

- EasyPro AquaFalls Filters have an inlet hole on each side of the filter (except mini AquaFalls)! Use the one that's most convenient for your incoming water and simply plug the other hole with a plug (included) or buy a ball valve and use the second hole as a drain for easier cleaning of the filter!
- AquaFalls Filters are easy to install! With other filters you have to bolt the front lip to the filter then use expanding foam to hold the fake rock in place. These filters have the simulated rock built right into the lip! Simply bolt lip to filter and you're done — no foam needed.
- AquaFalls Filters are easier to install than other similar filters and require minimal cleaning.
- AquaFalls Filters are buried into the ground making them easy to hide.

Rock/Plant Grates for AquaFalls filters

AquaFalls filters bury in the ground and once installed are hidden from view. Provides an ideal base for the beginning of your stream or waterfall!

See www.EasyProPondProducts.com for more information on Rock Grates and Matala Pads.

MINI AQUAFALLS - 14" Waterfall Opening

- Measures 18" x 24" x 18"
- Provides biological filtration for ponds up to 1,200 gallons
- One piece design (lip is molded into filter tub) for super-easy installation
- Liner from pond or stream is bolted to face of filter for water tight seal (hardware included)
- Maximum recommended flow rate is 40 GPM
- 1½" inlet fitting in back of filter
- Filter comes standard with two filter pads and one large mesh bag for filter media
- ***Ships UPS at dimensional rates***

Part#	Description
AT	Mini AquaFalls Filter
AT2	Mini AquaFalls with Matala Filter Pads

SMALL AQUAFALLS - 18" Waterfall Opening

- Measures 26" x 26" x 26"
- Provides biological filtration for ponds up to 200 square feet and/or approximately 2,500 gallons
- Includes two 2" bulkhead fittings allowing you to enter incoming water from either side of filter
- Filter comes standard with three filter pads and two mesh bags for filter media
- ***Ships UPS at dimensional rates***

Part#	Description
AS	Small AquaFalls Filter
AS2	Small AquaFalls Filter with Matala Pads
ASGR	Small Rock Grate

MEDIUM AQUAFALLS - 26" Waterfall Opening

- Measures 35" x 36" x 28"
- Provides biological filtration for ponds up to 600 square feet and/or approximately 6,000 gallons
- Includes two 2" bulkhead fittings allowing you to enter incoming water from either side of filter
- Filter comes standard with three filter mats and three mesh bags for filter media
- ***Ships motor freight***

Part#	Description
AM	Medium AquaFalls Filter
AM2	Medium AquaFalls Filter with Matala Pads
AMGR	Medium Rock Grate

LARGE AQUAFALLS - 50" Waterfall Opening

- Measures 36" x 65" x 36"
- Provides biological filtration in ponds over 700 square feet and/or up to 15,000 gallons
- Includes two 3" bulkhead fittings allowing you to enter incoming water from either side of filter
- Filter comes standard with three filter pads and six mesh bags for filter media
- ***Ships motor freight***

Part#	Description
AL	Large AquaFalls Filter
AL2	Large AquaFalls Filter with Matala Pads
ALGR	Large Rock Grate

Complete Pond Kits

These popular pond kits eliminate the time and guesswork of assembling a pond package. The kits include everything you need to build a beautiful water garden including liner, underlayment, skimmer, AquaFalls filter, flexible PVC pipe, high efficiency pump, underwater light kit, all necessary fittings and instructions. All components of these kits are top quality, from the heavy duty 45 mil EPDM liner to the long-lasting energy efficient pumps. Once installed, these ponds will provide years of enjoyment.

A complete pond kit consists of the following items:

1) 45 mil Rubber Liner
2) Pond Liner Underlayment
3) Pond Skimmer
4) AquaFalls Filter and Waterfall Base
5) High Efficiency Pump
6) Check Valve Assembly
7) PVC Flex Pipe
8) Bacteria
9) Waterfall Installation Kit (includes PVC glue, primer, silicone, liner patch and one can black foam)
10) Low Voltage, Underwater Light Kit with Two Lights and Transformer

SMALL POND KITS - Complete kits for ponds up to 11' x 16'

These pond kits come with the small filter (AS) and 25' of 1½" flex pipe.

Part #	Pond Size	Liner Size	Skimmer	Approx. Pond Gallons	Approximate Pump Flow Rate (GPH)
ES66FB	6' x 6'	10' x 10'	PSMFB	400	2200
ES611FB	6' x 11'	10' x 15'	PSMFB	750	2200
ES811FB	8' x 11'	12' x 15'	PSMFB	1000	2200
ES11AFB	11' x 11'	15' x 15'	PS1FB	1400	3100
ES16AFB	11' x 16'	15' x 20'	PS1FB	2000	3100

MEDIUM POND KITS - Complete kits for ponds up to 21' x 26'

These pond kits are a step above our small pond kits. Available in sizes from 11' x 16' to 21' x 26'. These kits use our PS1FB skimmer and medium size filter (AM) for increased filtering capacity, as well as larger check valve assemblies and 2" flex pipe for increased flow.

Part #	Pond Size	Liner Size	Approx. Pond Gallons	Pipe Length	Approximate Pump Flow Rate (GPH)
EM1116FB	11' x 16'	15' x 20'	2000	2" x 25'	4100
EM1616FB	16' x 16'	20' x 20'	2900	2" x 25'	4100
EM1621FB	16' x 21'	20' x 25'	3800	2" x 50'	5100
EM2121FB	21' x 21'	25' x 25'	4950	2" x 50'	5100
EM2126FB	21' x 26'	25' x 30'	6150	2" x 50'	5100

~ All pond kits include the filter brush style skimmers ~

LARGE POND KITS - Pond kits for ponds over 600 square feet

Large pond kits are designed for commercial and large-scale residential jobs where a truly impressive water feature is desired!

See www.EasyProPondProducts.com for more information on kit sizes for large ponds, many custom sizes also available!
