

■ Adheseal Tube (Black)

1/1

Black ... Art. nr 01.2451
White ... Art. nr 01.2452

Tube - 50ml

Adheseal is a unique MS polymer-based glue and sealant that retains its elasticity. The product is suitable for gluing and sealing and provides perfect adhesion to many, difficult surfaces such as metal, plastic, rubber, glass and Perspex. It is very quick to form a skin, fast curing, and extremely flexible.

Adheseal contains no solvents, so the glued or sealed area is not subject to shrinkage or cracking. Neither does the product contain isocyanates.

The product can be sprayed over easily with just about any modern paint system, even wet-on-wet, saving an enormous amount of time.

Adheseal is also perfectly suited for application between two parts for spot welding later.

The handy 290 ml cartridges make Adheseal very economical and easy to use.

Adheseal is also available in a very user-friendly 50 ml tube, which should be present in every workstation or booth. The small nozzle allows precisely the right quantity to be applied at the exact point where the sealant is required. This retail packaging can also be charged to the customer as a unit.

Properties:

- Very high degree of adhesion to most surfaces.
- Suitable for application before spot welding.
- Suitable for almost all modern paint systems.
- Can be sprayed wet-on-wet.
- Temperature range of -40°C to +100°C.
- Deliverable in different colours such as white, black, grey, brown, beige, etc.
