

A Secure Connection That Blends In...

Cord Connect™

The Cord Connect will provide a secure, water-tight connection for extension cords outdoors.

The Outdoor Green color will blend into the landscape, behind plants or shrubs and around or under decks.

Run cords in out of the way, hard to reach places without the worry of becoming disconnected. The Cord Connect will lock the connection while keeping it water-tight for worry free power.

When your customers need around the clock power during any and all seasons, they can count on the Cord Connect. The tapered ends of the protective housing allows the connection to slide along the surface without getting caught.

- Prevents Disconnects
- Water-tight Connection
- Outdoor Green
- Blends Into Landscape
- Snap On / Off
