

SELF-PRIMING EXTERNAL PUMP

Low Head Pressure

EXP Series - EXP3200

The all-in-one! The EXP Series integrates a basket-type pre-filter and self-priming capabilities into one efficient package for trouble free operation.

An internal diffuser allows for displacement of trapped air, allowing the pump to continue moving water for a short period of time, even when there is some air in the line. This provides a small cushion of comfort to the owners should the water level drop below the intake point.

- Self-priming
- Integrated 90 cubic inch strainer basket helps protect the internal rotating parts of the pump from damage due to external debris
- Simple cover allows for quick cleaning and replacement.
- Motor is totally enclosed and fan cooled for durability.
- Dual voltage: supplied with 8 foot, 115 volt power cord that can easily be field changed to 230 volt.
- Includes free 2" inlet/outlet unions
- 3 year limited warranty

Reliability you can count on!

Pump Protection

High Volume Centrifugal Pump Intake Filters

Heavy duty filters keep out large objects like sticks, fish and weeds so the pump screen doesn't clog as often.

Models to fit 2", 3", 4", 6" and 8" pipe. Includes PVC swing check valve to keep pump primed.

PIF
